SKILLS

Java | Python | C | c++ | Spring boot | Spring MVC | Html | CSS | JavaScript | React JS
Angular | UI/UX design | Figma application | Django | Cloud | Embedded Systems | Git Hub | SQL
JSON | Agile | Waterfall Methodology | Power BI

PROFESSIONAL EXPERIENCE

Developer, Infosys Limited

04/2022 – 12/2022

Hyderabad

- Proficient in front-end technologies such as React and Angular, as well as back-end languages including Java, Spring boot and Python, demonstrating a versatile skill set across the full development stack.
- Engaged in all phases of the Software Development Life Cycle (SDLC), showcasing the ability to work effectively within cross-functional teams to ensure comprehensive project management and successful project outcomes. Experienced in requirements analysis, design, development, testing, release, and ongoing support, showcasing adaptability and a exhaustive understanding of project management practices.
- Proven expertise in resolving complex issues, ensuring smooth technology integration, and successful project completion in a given time.

PROJECTS

Detail portfolio using front-end applications., <https://dilipkumar56.netlify.app/> 🌐

- Utilized HTML, CSS, and Node.js to construct a dynamic personal portfolio, showcasing proficiency in web development and the ability to seamlessly integrate diverse technologies for enhanced digital self-presentation.
- Engineered a database-driven feedback system, ensuring efficient storage and timely email notifications for received feedback, demonstrating adeptness in web development, user experience design, and database integration.
- Implemented a responsive user interface using Angular, HTML5, CSS3, Bootstrap, and JavaScript, enhancing user accessibility across various devices, platforms, and browsers, showcasing a commitment to user-centric design and technological adaptability.

Designed an app using the Figma application. 🌐

- Used Figma for UI/UX as a innovative application prototype focused on analyzing commodity price fluctuations pre and post-Covid, demonstrating proficiency in leveraging design thinking principles to enhance user experience.
- Demonstrated expertise in creating an intuitive and user-friendly interface to visualize changes in commodity prices in a simplistic manner, showcasing a commitment to user-centric design.
- Leveraged Figma to create an interactive and visually appealing prototype, highlighting a keen focus on innovation and the application of modern design tools to develop engaging and informative user interfaces.

E-commerce Website

Incorporated Python Django as the primary technology stack, along with HTML, CSS, and JavaScript, to develop a comprehensive e-commerce website for plant sales. Implemented essential features such as product listing, shopping cart functionality, and user authentication, showcasing proficiency in full-stack web development. Overcame challenges through effective problem-solving, ensuring seamless integration of diverse technologies and the successful completion of the project. Demonstrated strong project management skills and a keen understanding of e-commerce best practices, resulting in a robust and user-friendly online platform for plant sales.

EDUCATION

Florida Institute of technology, Computer Information Systems
3.66 Cgpa
